## **- Ooredoo Oman Rolls Out IoT network as a First in the Region**

### **Ooredoo Taking Steps to Put Oman on the Map for Internet-Of-Things**

**As the Sultanate's digital leader: "(...) Ooredoo Oman has delivered IoT network and eco-system using LoRaWAN technology. This step is part of the company's efforts to accelerate the SMART Government initiatives and create a highly intelligent, autonomous and efficient utility system. (...) The Low Power Long Distance network is specifically designed to meet the bandwidth needs of embedded sensors and IoT devices. (...)"** Via / More: [Ooredoo Oman rolls out IoT network using LoRaWAN technology](#)

**Sultan bin Ahmed Al Wahaibi, Chief Business & Wholesale Officer at Ooredoo, said: "By 2022, low power wide-area networks will make up a major portion of the growth of IoT devices. For that, it is crucial for us to establish high calibre connectivity solutions now."**
