ADAPTED TEXT VERSION OF OUR SITE'S HOME PAGE

Page Title: **Internet News**

Tagline: Weekly curated Internet news - Indexed by continent with in depth definitions, videos, maps, street views, historical info, and more.

Subheading: **Time for Global Internet News**

Since 2017 (when this Internet news source first started) I have noted that a large amount of the content provided kept a focus on the United States.

Here: Effective since March 2018 our American news becomes NORTH, CENTRAL and SOUTH AMERICAN Internet news! We turn the focus from Canada to Chile and beyond; per continent with a new (top of page) navigation and expanded content for users who visit using screen readers (thanks to audio and PDF files).

Subheading 2: **In detail – About this global Internet news source**

Here: We focus – per continent – on important Internet personalities and entrepreneurs, the latest on web security, privacy issues, internet governance, domain law, ICANN headlines, DNS information, big data collection, and more Internet news. The objective of this site is to give you a curated rapid overview of global web headlines as a historical, not-for-profit sampling of Internet news. (And to do this with either in depth (very detailed) original material or by adding needed definitions and sources under each main headline).

Subheading 3: **Are you a website owner or Internet entrepreneur?**

Here you'll find links to articles that will help you to keep up-to-date on important security issues, domain law, ideas to take your web marketing to the next level, and articles about important movers and shakers in the field. If you're a web user interested in Internet privacy and security, you'll find useful and educational articles linked from here that will help you to stay informed on the latest information to keep your web browsing safe and secure. And you will also find a lot of LOVE given to the creation of this project!

Note: This site (generally) does not hold, or aims not to express an “Editorial” point of view. Here is an exception: [African Internet Growth](#)
