About This Internet News Site

This is a not-for-profit, historical project started in 2017. We provide a weekly analysis of global internet news headlines indexed by continent with in-depth definitions, videos, maps, photography, street views, historical information & more! **The objective of this site is to give you a curated rapid overview of global web headlines as a historical, not-for-profit overview of Internet news.**

We focus on important Internet personalities and entrepreneurs, the latest on web security, web privacy issues, internet governance, domain law, ICANN headlines, DNS information, big data collection, and more!

Here you'll find links to articles that will help you to keep up-to-date on important security issues, domain law, ideas to take your web marketing to the next level, and articles about important movers and shakers in the field.

If you're a web user interested in Internet privacy and security, you'll find useful and educational articles linked from here that will help you to stay informed on the latest information to keep your web browsing safe and secure. Enjoy your visit to our pages!

Moving from US Internet News to a Global View

Since 2017 (when this Internet news source first started) I have noted that a large amount of the content provided kept a focus on the United States (see: a second link from www.ox.ac.uk for first rate insights on the impact of US media).

Here: Effective since March 2018 our *American* news becomes NORTH, CENTRAL and SOUTH AMERICAN Internet news! We turn the focus from Canada to Chile and beyond; per continent with a new (top of page) navigation and expanded content for users who visit using screen readers (thanks to audio and PDF files).
